

LEARN

Learn from women who are succeeding and leading in male-dominated industries. Session topics include mentoring and workforce development, negotiations, understanding strengths, becoming an industry influencer and more.

NETWORK

Grow your professional network by networking with other women at the conference and celebrating the accomplishments of your female peers. One of the main goals of Empowering Women is to create a community of women that can support each other. You know what they say, 'empowered women empower women.'

CONNECT

Find someone who can be your mentor (or mentee). A mentor is an invaluable resource who can help you look at the big picture of your career and help guide you in successful practices.

DEVELOP

Take charge of your professional development by building your leadership and communication skills. And then go home with a tool kit that you can reference to support you in that growth.

BUILD

Build up your brand(s) – everything you post, share, tweet, comment, like, is a reflection of your personal brand, and you are a reflection of the company you work for. And what better way to have your brand send a message that you support women in industry, than by being at Empowering Women in Industry 2021?
